A plethora of system dividers for the modern space, we at Parti glass, design and fabricate our products to fit in your space. We fabricate, supply and install partition systems to complement residential, commercial and corporate spaces. Parti glass Partitions are simple and hassle-free. The flexible configuration effortlessly moves the elegant frame combining structural design with conceptualization.

Structurally, partition walls offer customizable shapes and sizes, ultimate flexibility and easy maintenance. Offered in a variety of textures and materials in addition to fit every space without creative ideas being compromised.

With years of experience to provide solutions for offices, hospitals, banks and many more apart from commercial and corporate spaces, our team transform simple dimensions to design concept rooms. Working with architects and design engineers, have only added new profiles, offering exceptional services, innovative designed partition systems and unsurpassed quality.

At Parti glass, we provide not just customized solutions but also stylish, modern and functional interiors.

PLUS 85

Ideal for any work space that tackles a double necessity of privacy as well as maintaining transparency at a conference room or cubicle. Partition is a completely modular solution offering total flexibility for relocation whilst maintaining a high aesthetic visual appearance.
